

**ONLINE INTERVIEW FOR SELECTION OF RESEARCH ASSISTANT
ADVERTISEMENT NO.ICAR-CMFRI /SEETTD / 04/2022**

The ICAR- CMFRI research project on "Covid pandemic and marine fisheries sector in India: Impacts, externalities and stakeholders reflection on adaptation and mitigation" under the theme on Coastal Vulnerability was sanctioned under the research programme initiative by Indian Council of Social Science Research (ICSSR). The present research program is aimed at examining the socioeconomic implications of the Covid 19 pandemic across the marine fisheries value chain constituents including the primary stakeholders / across different sectors/stakeholders, identify the existing adaptive/mitigative measures adopted by the fisher folk amidst the pandemic towards alternative livelihoods / supplementary income, recognizing the positive externalities in terms of resource replenishment, changes in fish composition during the COVID times , developing adaptation mitigation plans coping up with the impacts of Covid 19 with participatory planning of the stakeholders and to identify appropriate guidelines to meaningfully engage the different stakeholders. The study will provide a comprehensive estimation of the extent of the impact on marine fish production, value chain and its stakeholders. Most importantly, fishing holidays and its effect on resource distribution during COVID will lead to developing future fisheries management policies and plan.
